Langley Lions Seniors District – Phasing Plan

Birch Building Replacement – West Facade

Building Form and Design

- ⇒ Design buildings according to the Phasing Plan and Birch Building Replacement figures in Development Permit Area Guidelines Section 17.6;
- ⇒ Design building massing and heights to maximize sunlight access into open spaces between buildings;
- ⇒ Reduce the apparent mass of buildings through roof design and façade articulation, materials and colours;

- ⇒ Avoid blank facades; use varying colours, materials and articulation for facade areas with no or little fenestration;
- ⇒ Provide balconies and roof gardens as amenity space;
- ⇒ Require ground floor units, wherever practical, to be ‘ground oriented’ with direct, gated access between units and public streets and open spaces. These units should be elevated above grade and include semi-private patios;
- ⇒ Require ground floor non-residential spaces (dining rooms, amenity rooms, foyers, entrances), wherever practical, to provide clear glazing, pedestrian access, patios and other features that visually and physically interface with adjacent open space and streets.
- ⇒ Orient building entrances to fronting streets;
- ⇒ Provide drop-off areas at grade level near the main building entrances wherever possible;
- ⇒ Provide all parking in secured underground parkades; and
- ⇒ Minimize above-grade projection of parkade structures.

Birch Building Replacement – East Facade

Exterior Finishes and Building Envelope

- ⇒ Use high quality exterior finishes to create attractive facades and ensure building envelope integrity;
- ⇒ Use durable and low maintenance materials, such as stone, metal and cementitious tile/siding.
- ⇒ Architectural designs that incorporate exterior finishes, colours and other features that complement and reflect the surrounding area are encouraged;
- ⇒ Screen roof top elevator rooms, telecom equipment and accesses with additional façade or architectural features;
- ⇒ Use stone and/or metal-based materials for fencing and other similar applications. Wood fencing is prohibited;
- ⇒ Above-grade parkade walls must be tiered to reduce massing at grade level, and treated and/or screened with brick/stone or other cementitious material facing, landscaping, landscaped berms or combination thereof. Exposed concrete parkade walls are prohibited
