Development permit: DP13-21

Hello Langley city council

I live next door to this proposed 4 story apartment Building project on the east side. This building also includes a underground parking garage.

I am the property owner of the house and garage next door to this project

According to the drawings or plans for this project the underground garage parking will border my property line the entire length which means the contractor will be digging a ten foot hole right on my property line.

According to Langley city Bylaws there must be a ten foot leah way between existing structures.

If the contractor does this it will do damage to my driveway, garage, trees and shrubs and my 80 year old red candian maple tree.

plese do not do this you will ruin my property.

Signed Property owner:
