

## Professional Program

Join us as ACE22 returns to an in-person format, with an online hybrid-option, where water sector professionals can come together and to learn, connect and be inspired to solve today's global water challenges. We hope you can join us in beautiful San Antonio! In addition we will stream content from our four most essential tracks.

### ACE22 Professional Program

#### ACE22 Tracks:

- Advances in Water Treatment
- A Focus on PFAS
- Asset Management
- Capital Improvement Projects: Planning, Design and Delivery
- Climate Resilience
- Condition Assessment
- Distribution & Plant Operations Management
- Intelligent Water Solutions
- Managing Lead in Water
- Small Systems Management and Operations
- Strengthening Public Trust
- Water Conservation
- Water Policy and Regulations
- Water Quality Challenges
- Water Resources Planning and Management
- Water Utility Management and Leadership
- Poster Sessions

#### ACE22 Virtual Tracks:

Over 30 hours of material on these highlighted topics will be presented in a hybrid manner, with both in person and online audience participation!

- Water Quality Challenges: Lead and PFAS
- Asset Management
- Infrastructure Insights
- Utility Management

## Conference Proceedings

Six weeks following the conference, ACE22 Proceedings will be available here for six months. The proceedings will contain 90% of the speaker presentations offered in the technical sessions.

## Hear What Attendees are Saying About ACE

**"We have been able to identify multiple solutions to some of the operational issues we have been dealing with in our system. We have also been able to learn more about new regulation and how best to address those challenges."**
