Subject: Fwd: UNDEMOCRATIC

Hon'ble Mayor and Councillors

I, JIVAN KUMAR RAJPUT , am writing to formally express my deep concern regarding the proposed **Greenway route**, as indicated on the recently published public map, which appears to run directly through our property at 19970.

This revelation has come as a complete surprise to us. At no point were we consulted or informed about this proposal, nor have we provided any form of consent for our land to be included. The idea of losing part of our property without prior discussion is extremely troubling and raises serious questions about the respect for **private property rights and due process**.

We respectfully request an explanation regarding the legal and procedural basis for publicly presenting this proposal **without prior engagement with the affected property owners**. We also ask for detailed information about the planning process, the criteria used to determine the Greenway's route, and what formal steps are available for residents to provide input or object.

We trust that the City of Langley is committed to transparency, respectful dialogue, and upholding the rights of its residents. We sincerely hope this matter must be addressed promptly and with fairness to all parties involved.

Moreover, the manner in which this proposal has been presented is **UNDEMOCRATIC** —highlighting our property so publicly has caused our family significant emotional distress. The suddenness and lack of communication have deeply affected our peace of mind. Quite frankly, we feel blindsided, saddened, and devastated. We bought this beloved property after arranging the funds through the collective hard work and sacrifices of our entire family. To see the city publicly announcing its proposal without any prior discussion or consideration of our circumstances has only intensified our distress.

I shall be looking forward to hearing from you.

Warmly,
JIVAN RAJPUT
