Enhancing Housing Stability through Preventive Measures and Supportive Programs

Langley City

Whereas the housing crisis in British Columbia is influenced by both insufficient housing supply and escalating demand pressures, leading to affordability challenges and housing insecurity that forces many individuals and families into unsafe and precarious living conditions, increasing their vulnerability to exploitation and victimization;

And whereas preventive strategies, including the provision of adequate supports and access to portable rental subsidies, are essential to maintain housing stability and prevent homelessness:

Therefore be it resolved that the Province of British Columbia, in partnership with local governments and non-profit housing providers, expand programs to reduce housing vulnerability by expanding portable rental subsidies, enhancing support services, investing in preventive strategies, and providing direct grants to local governments to improve housing stability.

Convention Decision:

Enhancing a Collaborative, Sustainable, and Inclusive Approach to Food Security and Well-Being

Langley City

Whereas food insecurity remains a critical issue in British Columbia, exacerbated by climate change, economic instability, and supply chain disruptions, disproportionately affecting vulnerable populations, Indigenous communities, and socioeconomically disadvantaged regions;

And whereas a resilient and inclusive food system requires sustained investment, cross-sector collaboration, and policies that integrate infrastructure development, technological innovation, cultural food systems, and community-driven approaches to ensure equitable access to nutritious food, economic resilience, and regional food security:

Therefore be it resolved that the Province of British Columbia collaborate with local governments to develop and implement a comprehensive food security and well-being strategy that ensures sustainable investment in local food systems, strengthens regional and provincial food networks, promotes innovation in agriculture and food technology, and enhances access to culturally appropriate, affordable, and nutritious food for all communities.
