

FROZEN ICE, WARM HEARTS

CREATING MEMORABLE ICE EXPERIENCES

Ice-Canada Rinks Inc. provides the ultimate experience in portable and modular ice rinks no matter the season. Proven by hundreds of ice rink projects every year, our patented and highly engineered rink system is the industry leader when it comes to energy efficiency, leak resistance, and consistent ice quality even in summer. From temporary entertainment to semi-permanent sports attractions, we build the best-in-class ice rinks for every occasion and need!

SOLUTIONS FOR ALL YOUR ICE RINK NEEDS

BEAT THE HEAT

Durable aluminum floors that can quickly adjust to sudden temperature changes for consistently high-quality ice.

FLEXIBLE RENTAL AND PURCHASE SOLUTIONS

Guiding you through the right options and solutions that best fit your ice project rental or purchase goals.

MODULAR DESIGN

A foldable floor system that can scale up, down or around to fit a variety of sizes, shapes and venue spaces.

ECONOMICAL

Aluminum outlasts common rubber and plastic ice floor systems and freezes water more efficiently to reduce energy consumption and operating costs.

CONVENIENCE

Arriving to you pre-assembled, we'll walk you through every step of the way for easy set-up of your new rink!

ABOUT ICE-CANADA RINKS INC.

Ice-Canada Rinks Inc. provides the ultimate experience in portable and custom ice rinks across Canada. As the only authorized dealer of Ice-World International products in the country, we supply the standard-setting products and ice solutions that have powered more than 600 annual rinks worldwide for over 25 years. From temporary entertainment to permanent attractions, we can build an ice rink for every individual occasion and need—whether it is for an amusement park show, downtown center rink, or sporting event.

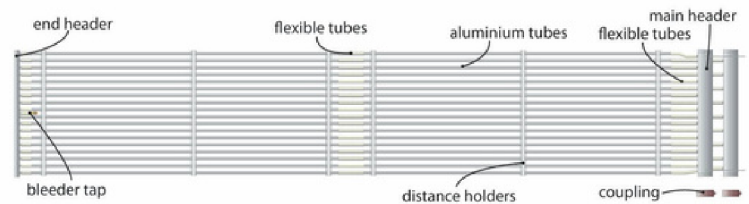

ADAPTABILITY

Our patented aluminum ice floor system provides the foundation for creating a quality, mobile ice rink that exceeds the performance of traditionally plastic and rubber floor systems. Due to aluminum's high cooling capacity, our rinks can quickly adjust to sudden temperature changes while maintaining reliable ice despite rain, wind and humidity. Foldable and pre-assembled upon arrival for easy set-up virtually anywhere, our system requires little instruction in the hands of Canada's seasoned rink experts. And as the system is modular, your event or project can be scaled up or down to a variety of shapes and sizes! The hardware system itself can be purchased separately to upgrade or complete any existing rink system.

INCLUSIVITY

Our services extend into total event management and support for any ice project. We are fully equipped to stage immersive experiences for not only private and corporate functions, but also city and community events. In addition, we offer a diverse range of products, including whimsical skating aids aimed to engage families, the adaptive skating community, skaters and non-skaters alike.

SUSTAINABILITY

Aluminum floors have proven to be a durable investment over time with 95% of its parts ultimately being recyclable or reusable. The high thermal conductive nature of its leak-resistant pipes freezes while consuming up to 40% less energy than other types of portable rinks. While the lifespan of plastic and rubber floors typically peak at 5 years, aluminum will far outlast that time frame by a financially viable amount.

Ice-Canada Rinks Inc. provides total event production services and is the exclusive authorized dealer of Ice-World International products in Canada, offering its NHL-endorsed aluminum ice floor system, Bobby® and Tommy® skating aids, on-ice Base® dividers and benches, rental skates and rolling skate racks.
