DRAWN	AA] A-1.2
PROJECT N	O 0906	

History, Characteristics and Context

The proposed development is the 2nd phase of the "Parkridge" townhouse development designed by FAA on the north side of the 55A Avenue. The first phase is completed and successfully marketed in 2017.

Both phases share an internal road, vehicular and pedestrian entries and servicing infrastructure.

This 2nd phase proposal occupies a lot area of 2180 square meter (0.54 acre) and has an overall density of 25 units per acre.

The first phase consisted of 13 units of two and three bedroom townhouses with tandem parking. The 2nd phase proposes 14 unit townhouses with combination 6 large units with side by side garages and 8 units with tandem parking.

Proposed project consists of 14 three storey two, three and four bedroom town homes. The average size of the two bedroom homes is 1,200 sq ft. the three bedroom townhouse is 1,450 and the four bedroom townhouse is 1,500 sq ft.

The lane is asphalt road from 198 Street and passes this site toward west.

The site presently occupies 3 trailer homes that would be removed after rent expiry date.

Photos of the Phase one development "*Parkridge*" and 33 unit development "*Marquee*" opposite side which was completed 3 years ago are shown on the rendering material provided in this submission package.

Urban Design, Form and Character

From a massing point of view, the buildings are organized in two separate blocks.

The larger units with double car garages located on the south side facing 55A Avenue and the other block facing the courtyard.

The layout of the site plan and orientation of the blocks follows the same urban concept envisioned for the phase one townhouse developments to the east side.

The townhouses along 55A have direct pedestrian access to the road to respond to a streetscape and an urban concept that is anticipated for the neighborhood.

The form and character introduces an articulated architectural expression similar to phase one development but with a different design vocabulary and different articulations.

Architectural expression shows a recognizable form and character expressing the identity of a "base and top" with transition in massing and change to the material and color.

The exterior form is modulated with repetitive bay windows and decorative cornices

A number of decorative elements including wood brackets, wood posts and decorative railings are incorporated in the design to accentuate the archit ectural articulation.

Entries are identifiable with Individual canopies, posts and strong color expression emphasizing on the urban character, pedestrian friendly environment and direct access to the street, private patios at grade and balconies on the 2nd floor provide active engaging interest fostering vitality.

Sustainability and Green Measures

- An attempt has been made to create a friendly and vibrant environment introducing a pedestrian friendly development with Identifiable entries and Individual canopies, creating active engaging interest and fostering vitality.
- · Close to the public transportation and amenities
- Variety of unit types and sizes are introduced for both small and large families with children
- Selection of the material is based on the use of low / non-toxic, low-maintenance, durable and sustainable products. Selection of materials is based on focusing on durability and sustainability with the use of building materials with high recycled content and from local sources. Low emission adhesives paint and flooring will also be used throughout the units
- The building envelope, glazing, and mechanical system will be design based on the new code and incompliance with ASHRE 90, 2010
- Where possible, operating windows are located on the opposite walls to draw ventilation across the occupied spaces. Overhangs provided at the roof level and intermediate windows as shading device
- Water efficient fixtures, energy efficient appliances and drought tolerance plants will be used to minimize the use of potable water
- All units have private patios at grade and decks on 2nd floor contributing to livability of the units and creating a family oriented environment
- The water consumption strategy in enforced through the use of alternate solution for sprinkler system by utilizing the domestic cold water system instead of a separate sprinkler line

• <u>Crime Prevention Through Environmental Design.</u> "CPTED"

 The services of Liahona Security have been hired; a report has been prepared for the site and their recommendations have been incorporated into the design

Items include:

- Enhance the safety and strengthen the perception of safety measure in site planning and landscaping designs
- Provision of identifiable Territoriality
- Provision and enhancement of Natural Surveillance
- Access and Perimeter Control

Identifiable entries with direct access to the street along with private and semi private patios.

Provision of the balconies on the 2nd floor creating a clear definition of hierarchy of space, a sense of territorial identity and sense of ownership.

The windows and the balconies along the 55A Avenue ensure the outdoor presence of the people, which provide "eyes on the street" and security for the private and public spaces.

Provision of Lights would be installed on both sides of the townhouse entries and garage doors illuminating the entire buildings and internal road. Outdoor lights are regulated by photo cell system.

The simplicity of the massing and it's orientation creates an open space environment visible from every angle with no enclave or semi enclosed spaces for strangers and wandering people.

The access control is achieved by ensuring visible entrances overlooked by windows and balconies as well as defining the entrance ways and controlling the point of access to the site.

Stone has been introduced at the base of the building blocks presenting a durable and high quality base free of graffiti.

Exterior Finishes

A variety of building materials is used with emphasis on richer and urban elements (Stone) at the main façade along the street.

Exterior finishes consist of vinyl windows, hardie siding, hardie shingle, wood trims, and glass aluminum railings. Ornamental brackets and fascias are introduced to further articulate the architectural vocabulary.
